QMSA Letters

The Platform for Experiences and Applications of QMSA

Welcome to read and contribute !

ChemAdder Team opens a forum for sharing of experiences and applications of QMSA

- This forum is meant for sharing of findings and developments on the fly, to speed up the use of QMSA.
- If you want to share your experiences in QMSA, make a PowerPoint presentation (or pdf-version of it) of less than (say) 10 pages and e-mail it to us. It will be checked and, if found relevant, shared as soon as possible – we need to have holidays sometimes. If problems are seen in your analyses, we'll offer support to fix the problems.
- Attach your NMR-data in form of cadder-files. The data will be accessible through our site, with the name of the contributor(s). All the IPR belongs to the contributors, but if any data is shared, the data will be free for all the readers.

Well come to read and contribute!
